

FortiClient VPN Instructions

Windows

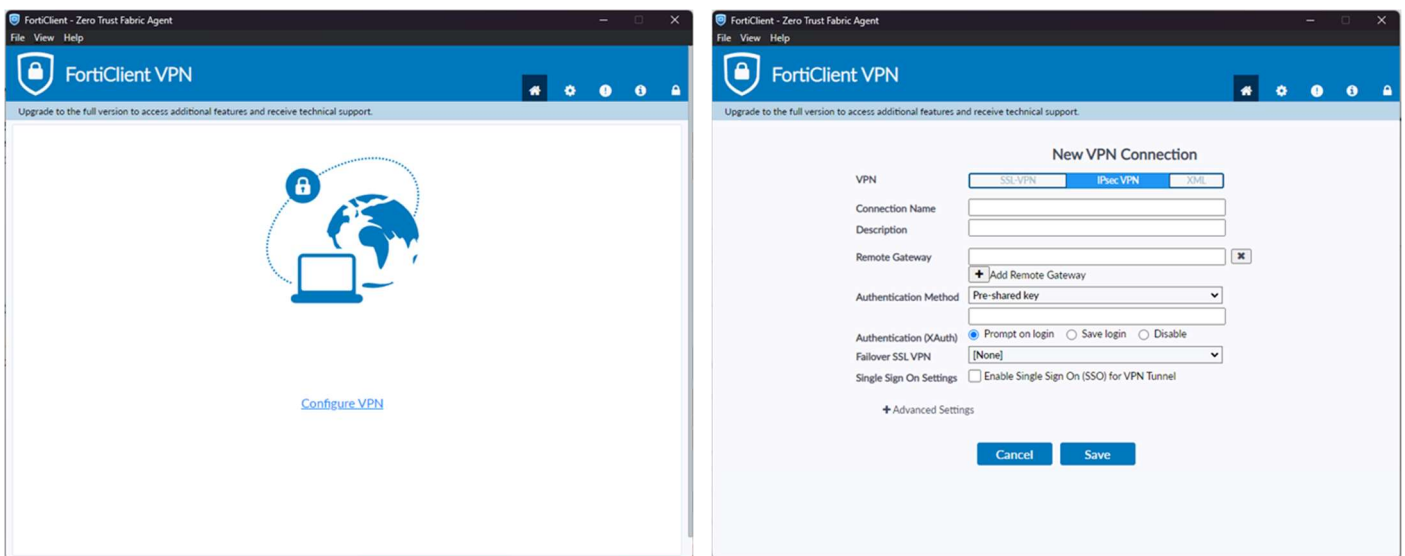

Step 1. Install FortiClient VPN

Visit <https://www.fortinet.com/uk/support/product-downloads> and browse to “FortiClient VPN-only”. Select “DOWNLOAD VPN for Windows”.

Run the downloaded installer with the default options, then run the FortiClient VPN application on your computer:

Step 2. Configure VPN Connection

Open the FortiClient VPN application and select “**Configure VPN**”.

Enter the details for the VPN:

- Connection Name - A descriptive name for the VPN.
- Remote Gateway - “Hostname” provided by Cronos.
- Authentication Method - "Pre-shared key" provided by Cronos.

Click save to return to the connection window. Enter the username and password provided by Cronos and click “Connect”.

The connection may take a minute to connect, once done your servers will be accessible.
